

AMALIA ANDREWS

is now with Kimley-Horn in Salt Lake City

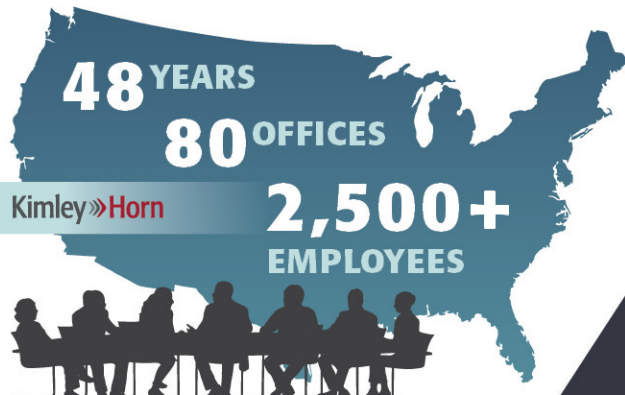

Amalia provides strategic communication and public involvement services to effectively and successfully engage stakeholders, project teams, and the community.

Through her extensive background in the transportation industry she has provided a broad range of services including community relations, business development and applying proven public involvement techniques to educate, inform, and involve the public. Projects large or small benefit from her skills at developing solutions for controversial or widespread issues. She is well-versed in creative and savvy communication and can strategically utilize new technologies to drive communication. Her areas of expertise include outreach development and execution; stakeholder relations; tactical communication; crisis management; event planning and public meetings; contractor and project team coordination; public comment recording and data management; partnering; and conflict resolution.

KIMLEY-HORN WELCOMES JONATHAN CAREY!

Kimley-Horn—a nationally recognized engineering and planning firm with a strong California presence—is pleased to announce the addition of Jonathan Carey, AICP, LEED AP to our San Jose office.

Jonathan Carey is an environmental planner and project manager with a track record of on-schedule and within-budget completion of technical and policy analyses. With almost a decade of experience throughout the San Francisco Bay Area, his projects include infill residential developments, large public facilities, transportation improvements, and commercial sites.

Jonathan is trained in writing, urban planning, and business administration. His recent projects include the Sunnydale-Velasco HOPE-SF Master Plan Project Combined EIR-EIS in San Francisco, the Moscone Convention Center Expansion Project EIR in San Francisco, as well as the SpringHill Suites Initial Study in Belmont.

Jonathan has a reputation for “getting the job done”—without compromising quality, integrity, schedule, or budget considerations—and Kimley-Horn is happy to set the stage for him to grow his practice within and outside the Bay Area.

Kimley»»Horn WELCOMES MIKE HOLLINGSWORTH!

Kimley-Horn, a nationally recognized planning and engineering firm with a strong California presence, is pleased to announce the addition of Mike Hollingsworth, P.E. to our Pleasanton office.

Mike has more than 40 years of project development, design, and management experience of road, bridge, and flood control projects. He's worked for over 36 years at Contra Costa County Public Works Department, and spent his last 23 years with the County supervising technical staff in the design of over 350 road and flood control project PS&Es. Over 150 of these projects included pavement widening, frontage improvements, and/or traffic signals.

All project plans and bid documents were prepared relying heavily on Caltrans guidelines and manuals with extensive use of their standard plans, standard specifications, and special provisions. Many projects were also federally-funded requiring thorough knowledge of Caltrans Local Assistance Procedures Manual involving

utility coordination, environmental staff coordination, and right-of-way acquisition. As the primary QA/QC person, these many projects provided Mike with an extensive knowledge of Caltrans Highway Design Manual and PS&E format as well as hydraulic principles and an appreciation for the importance of clear and accurate PS&E. All projects done under his supervision were noted for few project addenda and very few claims for extra work not addressed in the project documents.

Mike is passionate about delivering exceptional service to his clients. He has a reputation for being responsive to client needs and getting the job done without compromising quality, integrity, schedule, or budget. We are happy to welcome Mike aboard, grow his practice, and continue to make Kimley-Horn a leader in the industry.

KIMLEY-HORN WELCOMES ROBERT PADERNA!

Kimley-Horn, a nationally recognized planning and engineering firm with a strong California presence, is pleased to announce the addition of Robert Paderna, P.E. to our Oakland office.

Robert brings over 10 years of transportation and traffic engineering experience, specializing in transportation design and traffic operations. Robert is experienced in transportation design including preparation of plans, specifications, and estimate (PS&E) for traffic signals, intelligent transportation systems (ITS), express lanes, traffic operations systems (TOS), ramp metering, communications network design, transit signal priority (TSP), street lighting, signing and striping, stage construction, and traffic control. His experience in traffic operations includes signal timing and coordination, site access and traffic circulation assessments, and preparation of traffic impact studies.

Robert is passionate about delivering exceptional service to his clients. He has a reputation for being responsive to client needs and getting the job done without compromising quality, integrity, schedule, or budget. We are happy to welcome him aboard, grow his practice, and continue to make Kimley-Horn a leader in the industry.

KIMLEY-HORN WELCOMES KEVIN THOMAS!

Kevin Thomas, CEP has over 30 years of experience in CEQA/NEPA compliance and implementation. His technical expertise includes coastal desalination and water supply projects with a unique emphasis in strategic planning and regulatory permitting. His depth of knowledge in air quality, noise, hazardous material, visual analysis, and community outreach offers invaluable insight to both private and public client sectors throughout California.

Kevin is one of the state's most recognized experts in environmental permitting of ocean and brackish desalination projects, having prepared CEQA/NEPA documents and feasibility studies for more than 20 desalination projects. He is a leader in the environmental planning field and manages complex, multi-disciplinary teams for major capital improvement and land development projects. Clients rely on Kevin to provide guidance through the complexities of California's permitting process.

Ranked **#12 for water treatment and desalination**, and **#22 for water supply** by ENR, Kimley-Horn is excited to welcome Kevin to the team. His experience will further strengthen our growing Planning and Water Resources practices, and contribute to the 14 offices in California.
